

DIY TIP SHEET:

TIP 1. CONSTRUCTION

Make the frame from wood planks at least 12” high. Use T&G floorboards on top.

TIP 2. BED

Cut a mattress to suit your child out of 4” foam. Use a strap for blankets and pillow.

TIP 3. WHEEL LOCKS

Use wheel locks when the bed is pulled out so it doesn’t roll back with the child in it.

TIP 4. TOY BINS

Use space between beds for lift-up bins. Provide recessed metal pulls for the lids.

TIP 5. CHAIR STRIP

Provide a wood strip across the edge of the platform, so chairs won’t roll over the edge.

TIP 6. FLOOR FINISH

Carpet the top and side of the platform.
