

TIP 17: ADD SOME DRAMA

A mirror on the back wall behind the glass shelves and a shiny metal plate on the ceiling, make everything look bigger and more glamorous. Add ceiling lights that go on automatically when the doors open and everyone will be amazed.

TIP 18: BECOME A NEAT-NIK

You have to be ultra neat and you have to limit yourself to only the most useful utensils. You can't have a lot of anything. Nothing must be unused. Nothing must go to waste.

TIP 19: BE A JUGGLER

It helps to be ambidextrous. Cooking even a basic meal in such a tiny space can be a juggling act. You may have to use the sink, the cook plate, the top of the microwave and even the top of the toaster for extra counter space. After a while, it is second nature.

TIP 20: GET A ROLLING TABLE

I suggest keeping a small rolling table on wheels near the closet-kitchen. You can use it for preparing the meal and serving it later on.
